

Photon.Compression.Primitive  
PackBitsExt.ReadPackedBits

Photon.Compression.Primitive  
PackBitsExt.WritePackedBits

Photon.Compression.BitCounter.  
UsedBitCount

```
graph LR; A[Photon.Compression.Primitive PackBitsExt.ReadPackedBits] --> C[Photon.Compression.BitCounter.UsedBitCount]; B[Photon.Compression.Primitive PackBitsExt.WritePackedBits] --> C;
```

The diagram illustrates a dependency where two methods, `ReadPackedBits` and `WritePackedBits`, both utilize a shared `UsedBitCount` property. The methods are represented in white boxes on the left, and the property is in a gray box on the right. Blue arrows indicate the flow of dependency from each method to the bit counter.
