

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class MobileDisableAutoSwitchControls
    MobileDisableAutoSwitchControls --|> MonoBehaviour
```

The diagram shows a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'MonoBehaviour', while the other two are empty. Below it is the 'MobileDisableAutoSwitchControls' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name 'MobileDisableAutoSwitchControls', and the two lower compartments are shaded gray. A blue arrow with an open triangular head points from the top of the 'MobileDisableAutoSwitchControls' class to the bottom of the 'MonoBehaviour' class, indicating that 'MobileDisableAutoSwitchControls' inherits from 'MonoBehaviour'.
