

Photon.Pun.Simple.Contact  
Trigger.OnDisable

Photon.Pun.Simple.Contact  
Trigger.OnEnable

Photon.Pun.Simple.NetMaster  
Callbacks.RegisterCallbackInterfaces

```
graph LR; A[Photon.Pun.Simple.Contact Trigger.OnDisable] --> C[Photon.Pun.Simple.NetMaster Callbacks.RegisterCallbackInterfaces]; B[Photon.Pun.Simple.Contact Trigger.OnEnable] --> C;
```

The diagram illustrates a mapping from two distinct event triggers to a single callback registration method. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'Photon.Pun.Simple.Contact Trigger.OnDisable', and the bottom box contains 'Photon.Pun.Simple.Contact Trigger.OnEnable'. On the right, a single gray rectangular box contains the text 'Photon.Pun.Simple.NetMaster Callbacks.RegisterCallbackInterfaces'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'OnDisable' and 'OnEnable' events are handled by the 'RegisterCallbackInterfaces' method.
